Final Verification Report

Hash integrity

Original files were hashed before and after. No original files were modified. oscillator_verification.py matches; results.json does not match the required hash.

Environment

Windows 11 AMD64; Python 3.13.7; NumPy 2.4.4; SciPy 1.17.1; SymPy 1.14.0; Matplotlib 3.10.9; ReportLab 4.4.4; seed 0.

Task B

BLOCKED because results.json hash mismatch stops the original-grid reproduction and gate validation.

Task A

BLOCK. Top findings: restricted original code, unavailable figure arrays, and non-frozen statistical gates.

Reproducibility

Use the listed commands and expected output file names from REPORT.md.

Gate	Gate value	Result
Cumulative	1e-6	BLOCKED
Pointwise	BLOCKED / unspecified	BLOCKED
